

Prince Brummell GNANGNON

Fullstack Software Engineer — Fintech & AI

Cotonou, Benin • +229 01 59 97 52 48 • prince.gnangnon2@gmail.com
linkedin.com/in/prince-brummell-gnangnon • github.com/Prince-devC • Open to remote & relocation

PROFESSIONAL SUMMARY

Fullstack software engineer with 5+ years building and shipping production-grade platforms across fintech, legal-tech and consumer web. Experienced in payment aggregators and bank-to-wallet gateways handling critical, high-trust transactions, and in applied AI (RAG, LLM integration, automation). Strong across the stack — Laravel, Python/Django, React/Next.js, Flutter/Kotlin — with deep expertise in secure API design, microservices and clean, reliable code. Comfortable owning products end to end, from architecture to delivery.

CORE SKILLS

Languages & Frameworks	PHP · Laravel · Livewire · Filament · Python · Django · Frappe/ERPNext · JavaScript/TypeScript · React · Next.js · Tailwind CSS · Flutter · Kotlin · React Native
Fintech & Integrations	Payment gateways · Mobile Money aggregation · Bank-to-Wallet APIs · E-wallet systems · OAuth2 · JWT · SSO · Secure REST APIs
AI & Automation	RAG pipelines · pgvector · LangChain · LLM integration · MCP · n8n · Make · Prompt engineering
Architecture & DevOps	Microservices · Event-driven (RabbitMQ) · Redis · Docker · API gateways (Kong/Traefik) · Automated testing · CI/CD · Git/GitHub
Databases	PostgreSQL · MySQL · pgvector

PROFESSIONAL EXPERIENCE

Fullstack Software Engineer — **BFT Group** · Fintech & AI Platforms Oct 2024 – Present · Cotonou, Benin

- Designed and built a multi-wallet Mobile Money aggregator unifying major operators behind a single API and interface, simplifying integration for merchants.
- Architected a secure Bank-to-Wallet transaction gateway (bank integrations, SSO, critical money-movement flows) with a strong focus on reliability and security.
- Built an AI assistant powered by a RAG pipeline (pgvector) with automated document ingestion for accurate, context-aware answers.
- Delivered secure RESTful APIs (OAuth2/JWT) and modern back-office interfaces (Filament/Livewire).
- Applied microservices and asynchronous event processing (RabbitMQ); set up automated testing and optimized performance of transaction-critical services.

Founder & Lead Developer — **NURU Technologie** 2026 – Present · Cotonou, Benin

- Founded and building **NURU Prime**, an on-demand premium services platform (web + React Native mobile) with AI-assisted dispatch and Mobile Money payments.
- Own the full product: architecture, Laravel backend, real-time tracking, admin console and go-to-market.

Web Developer (freelance & agency) 2023 – 2024 · Cotonou, Benin

- Delivered frontend and backend features across multiple client web platforms (see Selected Projects).
- Translated UI/UX designs into responsive, interactive interfaces; refactored and optimized legacy code and fixed production issues.

SELECTED PROJECTS

NURU Prime — On-demand premium services platform (Laravel · React Native · AI). prime.nuru.technology	Reevup — Customer reviews & online-reputation platform. reevup-avis.fr
MonDroit — AI legal assistant making Benin's Digital Code accessible (web · WhatsApp · Telegram). mondroit-bj.vercel.app	KeyGo — Mobility platform ("the key to your mobility"). keygo.giize.com
Catholique E-Services (CES) — Parish e-services: mass requests, donations, pilgrimages, online bookstore. catholique-eservices.com	ARE — Business web platform. are.lu

EDUCATION

Professional Bachelor's Degree — Computer & Software Systems · UATM Gasa Formation, Cotonou	2021 – 2024
Baccalauréat (High School Diploma) · CEG Danto, Porto-Novo	2021

LANGUAGES

French — Native · English — Professional working proficiency
